Good morning SJBHD Executive Director@! I Hope you are successful in having some measure of control over your day today. ☐

Please do not mention my name to Gina McCarthy unless prompted by Shaun or something. The main point of the message though: NMSU & NMDA web published "Current risks of using Animas / San Juan River Water on Crops Following Mine Spill" yesterday. See email for link.

Also note NMED has web published a toll free Gold King Mine Spill for sampling requests, see same emailed link. FYI, that number had not taken any public calls yet as of 630 am.

Take it slow today, it will all still be there tomorrow.
